GO_Biological_Process_2021
regulation of endothelial cell development (GO:1901550)
negative regulation of translation (GO:0017148)
regulation of amyloid-beta clearance (GO:1900221)
termination of RNA polymerase II transcription (GO:0006369)
regulation of amyloid precursor protein catabolic process (GO:1902991)
protein localization to plasma membrane (GO:0072659)
regulation of myosin-light-chain-phosphatase activity (GO:0035507)
positive regulation of amyloid-beta clearance (GO:1900223)
protein localization to cell periphery (GO:1990778)
protein localization to membrane (GO:0072657)
