GO_Biological_Process_2021
hematopoietic progenitor cell differentiation (GO:0002244)
regulation of amyloid fibril formation (GO:1905906)
positive regulation of protein kinase activity (GO:0045860)
regulation of hematopoietic stem cell proliferation (GO:1902033)
positive regulation of tau-protein kinase activity (GO:1902949)
regulation of peptidyl-cysteine S-nitrosylation (GO:2000169)
negative regulation of cell cycle phase transition (GO:1901988)
regulation of systemic arterial blood pressure by renin-angiotensin (GO:0003081)
regulation of cardiac muscle cell action potential involved in regulation of contraction (GO:0098909)
myeloid leukocyte mediated immunity (GO:0002444)
