GO_Biological_Process_2021
positive regulation of Golgi to plasma membrane protein transport (GO:0042998)
negative regulation of phagocytosis (GO:0050765)
regulation of endoplasmic reticulum unfolded protein response (GO:1900101)
homeostasis of number of cells (GO:0048872)
positive regulation of ceramide biosynthetic process (GO:2000304)
regulation of leukocyte activation (GO:0002694)
regulation of establishment or maintenance of cell polarity (GO:0032878)
positive regulation of macrophage derived foam cell differentiation (GO:0010744)
phosphatidylinositol acyl-chain remodeling (GO:0036149)
phosphatidylglycerol acyl-chain remodeling (GO:0036148)
