GO_Biological_Process_2021
regulation of postsynaptic neurotransmitter receptor activity (GO:0098962)
regulation of cardiac muscle cell action potential involved in regulation of contraction (GO:0098909)
triglyceride-rich lipoprotein particle remodeling (GO:0034370)
regulation of peptidyl-cysteine S-nitrosylation (GO:2000169)
regulation of systemic arterial blood pressure by renin-angiotensin (GO:0003081)
surfactant homeostasis (GO:0043129)
chemical homeostasis within a tissue (GO:0048875)
chylomicron remnant clearance (GO:0034382)
myeloid leukocyte mediated immunity (GO:0002444)
regulation of hematopoietic stem cell proliferation (GO:1902033)
