GO_Biological_Process_2021
defense response to bacterium (GO:0042742)
antibacterial humoral response (GO:0019731)
defense response to Gram-positive bacterium (GO:0050830)
regulation of neutrophil activation (GO:1902563)
induction of bacterial agglutination (GO:0043152)
antigen processing and presentation of endogenous peptide antigen via MHC class I via ER pathway (GO:0002484)
antigen processing and presentation of endogenous peptide antigen via MHC class I via ER pathway, TAP-independent (GO:0002486)
positive regulation of respiratory burst (GO:0060267)
detection of molecule of bacterial origin (GO:0032490)
antigen processing and presentation of exogenous peptide antigen via MHC class I, TAP-independent (GO:0002480)
